

Champaign County SWCD
Spring 2010 Fish Sale Information

The Champaign County SWCD holds two fish sales every year. We are currently taking orders for our spring fish sale.

 **Orders need to be in by Thursday, March 25, 2010.**

 **Grass Carp** require a special permit (we will get the permit), but orders need to be submitted by **March 18th**.

 The fish pickup date has been set for Tuesday, April 6th from 1:00 – 2:30 p.m. at 2110 W. Park Ct., Champaign (1 block West of Country Fair Drive, West of Schnucks & Texas Roadhouse).

We will send reminder cards and will schedule pickup times that are spread out so we can minimize the waiting time.

The following page shows the species and sizes available.

Fish Descriptions:

Channel Catfish: They are excellent for food and sport fishing. They are compatible with all pond species and can grow 1 lb. per year if fed with commercial feed.

Black Crappie: Excellent for food and sport fishing; however, they can quickly overpopulate and are not recommended for small ponds.

Fathead Minnows: These are especially important when stocking new ponds. They are also good for ponds prior to stocking largemouth bass. Young bass use them for food.

Hybrid Redear: (New this fall) It is a cross between a male bluegill and a female redear. It does eat snails and clams and has a slightly higher reproductive rate than the Hybrid Sunfish.

Hybrid Sunfish: They come from crossing a male bluegill with a female Green Sunfish. They produce 90% males so they do not over populate a pond. They are a good choice for small ponds and will grow ¼ to ½ lb. per year. They can reproduce with bluegills if they are present in the pond.

Largemouth Bass: One of the most sought after game fish. The average size is 20 inches and they may live up to 23 years.

Red Ear Sunfish: Excellent in deeper ponds and with Bluegill and Hybrid Sunfish.

Straight Bluegill: An excellent sport fish that grows a little slower than sunfish.

Triploid Grass Carp: They eat many weeds, but not algae, and do not reproduce.
